LETTER OF RECOMMENDATION

To: Whomever It May Concern

Date: 31/10/2026

Subject: Recommendation Letter for Ved Patel

I am writing to recommend Ved Jasmin Patel for a position within your organization or academic program. He completed a summer research internship under my direct supervision at the Center for Military Airworthiness and Certification (CEMILAC), DRDO, Bengaluru.

During this tenure, he was tasked with an R&D project focused on computational fluid dynamics. The work required a combination of mathematical modelling, algorithm development, and numerical simulation. He designed and developed a 2D incompressible flow solver natively in MATLAB from first principles. Following this, he implemented SIMPLE algorithm to resolve complex pressure-velocity coupling.

Building on this core computational framework, he transitioned to systematically validating his solver. He tested the code across multiple aerodynamic benchmarks, successfully simulating steady flow in a lid-driven cavity, internal step geometries, and unsteady vortex shedding past a bluff body, thereby validating his initial mathematical models.

Throughout the project, he demonstrated a strong aptitude for scientific computing and fluid dynamics. He showed a remarkable ability for debugging complex algorithms from scratch and troubleshooting discrepancies in numerical stability.

I highly recommend Ved for your internship or program, as his technical background, independent coding skills, and rigorous approach to research are well-suited for any demanding professional or academic environment. Please feel free to contact me should you require any further details regarding his work at CEMILAC.

Sincerely,
